Kathleen Natura's Power Sculpt offers a highly effective and efficient solution to body contouring without surgery. It combines three advanced technologies: LED,

**Sculpted to perfection**

CACI SCULPT is an innovative body toning system that provides measurable inch loss as well as firmer, more defined and sculpted body contours, penetrating deeper to specifically tone and firm the underlying body muscles. The system features 20 pre-set treatment programs for slimming, toning, contouring, lymphatic drainage and cellulite, as well as specifically targeted and customisable applications for the stomach, bust, arms, hands, legs, thighs and buttocks. Available at [caci-international.co.uk](http://caci-international.co.uk)

**Perfectly painless**

The Fibra DFA from the Baldan Group is an innovative technology in the field of high-end hair removal treatments that focuses on precision, maximising use of energy. DFA Fibro is a fibre coupled 610nm multiple diode located inside the body of the machine (as opposed to in the handpiece), so the heat is eliminated, and the treatment is totally painless for the client. Visit [baldangroup.com](http://baldangroup.com) for further details

**Saving face**

3JUVE® uses three independent skin rejuvenation technologies in combination, to help treat the three most common signs of ageing; the Resurface Fractional Laser for fine lines & wrinkles, Rebright 585 IPL for veins and sun damage, and the Remodel RF for eyes and jawline lifting. 3JUVE® is an entirely customisable treatment which allows the operator to deliver varying proportions of the three different technologies, depending on the individual requirements of the client. Call 01477 536 977 or visit [lynton.co.uk](http://lynton.co.uk)

**I do, I do... It's all in hand...**

LPG® endermologie uses its all-new CELLU M6 Alliance to turn back the tell tale signs of ageing on the hands, naturally stimulating the skin's surface, reactivating cells and firming the tissue, in a ten minute treatment that boosts the skin's natural synthesis. As a result, hyaluronic acid production is increased by up to 80% boosting suppleness. For further details visit [endermologie.com](http://endermologie.com)
